(10) The drainage project is estimated to cost Rs 29,000 The Chief Engineer requests that a sum of two-thirds of the cost amounting to Rs 19,333 may have been provided in the current year's budget for meeting his quota on the approximate basis of drainage areas. The Budget of the Public Works Department for the current year shows that the closing balance is expected to be Rs 4933 The Chief Engineer can easily meet his quota.

AS 6/2/30

(11) The Executive Engineer would first start the work which will be a heavy item. Even if this portion is sanctioned it can only be granted in instalments of Rs 5000 and Rs 4000 years. The Accounts Officer has no amount available for being granted to the Chief Engineer for the current year. The Chief Engineer will have to start the work with these funds first may from half the sum which may be spread over 5 years by which time the finances of the Chief Engineer may also improve & the question of the drainage scheme may be considered when it is found to be indispensable.

OFFICE OF THE DEPUTY COMMISSIONER
CHITALDRUG DISTRICT

Dated Chitaldrug 17th October 1928

FROM

C S Kuppuswami Iyengar, Esquire,
Deputy Commissioner
Chitaldrug District

GEN & REV SECT
23 OCT 1928
L S G & I
1933

To

R Ranga Rao, Esquire B A, B L,
General Secretary to the Government of Mysore,
B a n g a l o r e

Sir,

In forwarding herewith the file of correspondence ending with the Chitaldrug Sub Division Officer's memo No G R 2359 date 12th September 1928 re the drainage works to be undertaken by the Municipal Council of Hiriyur, I have the honor to state that an estimate for Rs 28,825/- has been prepared by the Executive Engineer, Town Planning Division for improving the drainage in th town The letter of the Executive Engineer and the report accompa ing the estiamte clearly explain the necessity for the work

RO 21/IX

The question of financing the work was placed before the unicipal Council at their meeting held on 31st July 1928 when they resolved that they would bear only 1/3 of the cost of the work and that the Government may be requested to contribute the remaining 2/3 of the cost of the work

The President of the Municipal Council has reported that the whole work will not be undertaken during the current year but will be spread over 3 or 4 years as suggested by the Executive Engineer He has further reported that the construction of main drains only will be taken up during this year at an estimated cost of Rs 5,630/-

The resources of the Municipal Council are not adequate to meet even half the cost of the work The Municipal Council have deposited a sum of Rs 11,000/- in the State Loan Bonds and this has been reserved for completing the drainage work Besides th

there are other improvement works proposed to be taken up by the Municipality such as the improvement of the Shandy Maidan and the laying out of the extension

In these circumstances, I recommend sanction of Government may kindly be obtained to the proposal of the Municipal Council viz that 1/3 of the cost of the work may be borne by the Municipal Council, the remaining 2/3 being met by Government The grant of Rs 8,000/- for Town Improvement Works sanctioned for this District for 1923-29 has all been distributed and no amount is available out of it for this purpose

I have the honor to be,

SIR,

Your most obedient servant,

Deputy Commissioner

GR 1970

'From the report of the President it is seen that the Drainage Project is estimated to cost Rs 28,825/- The Municipal council have accepted the same and have resolved to meet only one-third of the total estimated cost, which amounts to, roughly, 10000/-, the rest being asked to be borne by Government The one-third cost of the work is proposed to be met out of the Surplus of Rs 4000/- or out of the investment of Rs 10000/- in State Loan Bonds But the Municipal Council have resolved in their meeting held on 31-7-78 that out of the invested amount (Viz Rs 10000/- in State Loan Bonds) a sum of Rs 7500/- may be invested in Post Savings Bank Fixed Deposits' Hence there remains only about -

the Municipal Council [illegible] Rs

on the drainage works. The Sub Divisional Officer is therefore requested to enquire and report how the Municipal Council propose to finance the scheme, so far as their quota of expenditure is concerned.

The enclosures received with his memo together with the papers received with his No MC 14/28-29 dt 12/8/28 are returned herewith.

25 8 28

Municipal MC 10/28-29 Councillor 24/8

Sir,

With reference to the above cited, I beg to submit that the whole work will not be carried out in one year, but spread over 3 or 4 years. This year, it is proposed to take up only the main drains, costing Rs 5630, for which the Council have allotted out of the closing balance at their credit. In subsequent years, the Council will meet their share out of the balance at its credit or if it becomes necessary to do so, by withdrawing the amount from the Fixed Deposit account. It may be noted that

out of the realizations from State
loan bonds only Rs 7,500 will be kept
under fixed deposit & the balance (
Rs 11500 – 7500) or Rs 4000 will be
kept in the savings bank, so that this
account together with the balance
now in the treasury, which is not less than
Rs 4000 or about Rs 8000 in the aggregate
will be available for improvements
works The question of withdrawing from
the fixed deposit account will arise
only after Rs 8000/- have been
worked out

It is requested that early sanction
may be kindly obtained to the
Council's proposal

The estimate & the record are
enclosed

Sir

With reference to your letter no 2297 Books dated 21st June 1928, calling for the views of the municipal Council on the matter of selling Mysore State Loan Bonds of the face value of Rupees 10 100 now held by you on behalf of the municipal Council and reinvesting the proceeds on Government five year Savings Bank fixed deposits, I have the honour to state that the subject was considered by the municipal Council at their meeting held on the 31st July 1928 and a copy of their resolution is enclosed for reference

2 The municipal Council have got to finance several urgent improvement works such as water Supply and drainage and will require a portion of their invested savings It is not therefore convenient to reinvest the whole sum in fixed deposit certificates As agreed to by the Council a sum of Rs 7500/- may be

to invested, The balance being Kept in The Government savings Bank I request That necessary action may be kindly taken in accordance with The resolution and The back enclosed herein

Chitaldrug

Dated 4th August 1928
No. M.C. 10 of 28 29
Enclosure one title

Sir,

R 1642
R P
8/8/28
S G
by

The question of providing Hemayur Town with a comprehensive drainage scheme has been engaging the attention of the municipal Council for some time past the absence of drains, resulting in the formation of cess pools, and the vicinity of the stagnant river have greatly contributed to the unhealthiness of the town and made the lives of the residents anything but pleasant The Executive Engineer, Town Planning Division,

who was requested to favour the municipal Council with a suitable drainage project, was good enough to visit the town and furnish the Council with the accompanying project costing about Rs 28825/- which provides for the construction of main and street drains The main drains are estimated to cost Rs 5630/- only The report accompanying the estimates explains the salient features of the project

2 The municipal council considered in detail the whole project at their meeting held on the 31st July 1928 and they have come to the conclusion that the project is suitable for the requirements of the town and may be adopted and that a beginning may be made this year with the main drains the other works being taken up year by year A copy of their resolution is submitted herewith for reference

3 In the matter of financing the scheme the Council have accepted liability to meet one third of the total cost, and request that the Government may be pleased to make a grant of the remaining two thirds in view of the extreme poverty of their income Their present normal income is about Rs 3500/- and

thus leaves barely any surplus for carrying out large improvement works The town is a small one with about 500 houses including sheds and a population of 3 000 and There is hardly any scope to increase The income in the present condition of the towns people During his recent tour The Dewan Saheb was pleased to promise The towns-people that any request for a for a grant from Government for improvement works would be favourably considered I therefore request That the request of the municipal Council for a grant of two thirds of the cost of scheme may be kindly recommended for The favourable consideration of Government with your kind support

4 As proposed in the report, The work will be taken up by stages so That it may be easy for the municipal Council and The Government to meet Their respective quotas As regards The municipal Councils share, it will be met from The closing balance of about Rs 40001- at Their credit or out of The investment of Rs 10 1001- in State Loan Bonds which will be sold In conclusion I beg That you will be pleased to recommend sanction to the following proposals —

(I) To obtain administrative sanction to the whole project and to order the work being executed by the Sanitary Division charges for establishment, tools and plant being waived

(II) To obtain a grant of two-thirds of the cost from the The Government for the Scheme

(III) To start the construction of main drains this year at a cost of Rs 5630/- The Government's share there of being made available This year

V) To incur an expenditure of Rs 6000/- each year for the execution of the remaining works so that The whole project may be completed in the course of 5 years

I beg to remain

FROM

H F MARKER Esq L C E M R San I,
Executive Engineer Sanitary and Town Planning Division
BANGALORE

To

The President,
Town Municipal Council, HIRIYUR

Sir,

With reference to my inspection note on the town of Hiriyur on 11th and 13th September 1927 and your reference ~~xxx22~~ No A1/27-28 dated 11-7-1927, I have the honour to forward herewith a comprehensive drainage scheme for the whole town amounting to Rs 28,825/- (out of which main drains amounts to Rs 5,630/- only) together with necessary plans and estimates The Municipal Council should not be alarmed of the big figure of the total cost of the scheme It is not intended that the whole scheme should be worked in a year or two, but it is to be spread out over a period of 8 to 10 years according to their resources by spending a small sum of about Rs 3,000/- a year and work it out in different stages in the following order Firstly main drains, secondly street drains in the congested localities wherever sewage stagnates and which requires immediate relief and lastly the remaining drains This way of doing the work will not burden the finances of the Municipality The Municipal Council may also expect reasonable grant from the Government for the drainage works which will reduce their burden to some extent As the town is very badly in need of drains in some of the congested localities as pointed out in my inspection note para 1 I would advise the Municipal Council to make a beginning this year by starting the construction of

main

main drains first which costs only Rs 3,630/- which can be spread over a period of 2 years

I have the honour to be,

Sir,

Your most obedient servant,

Executive Engineer,

Sanitary and Town Planning Division

Encl

epoit to accompany tl e Drainage Scheme to the town of Hiriyur - Chitaldrug District

****

Ref Vide Municipal President Hiriyur Town No 21/ 27-28 dated 11-7-1927

REPORT

Nature of the town - 1 The area of the Hiriyur town has got a natural slope towards East and West with a ridge in the middle running North to South, and this ridge facilitated to divide the town into two drainage areas I, drainage area towards West and II drainage area towards East

System of drainage proposed - 2 The system of drainage proposed to be adopted is of surface open drains, and the drains are designed for the conveyance of sewage as well as rain water The proposed drains are of Silk pattern drains (vide blue print copy No 413) which is in vogue throughout the Province It will be seen from the accompanying key map and block maps of the town that several colours have been used to indicate

1 Contours - in white lines
2 Ridge line - in Gambaje
3 Main drains - in vermilion & black lines
4 Street drains - in vermilion lines
5 Distances - in Indian ink
6 Section of Sill pattern drains - in flake white

Capacity of drain and Velocity - 3 The drains are designed to carry off rainfall of 1" per hour with a maximum and minimum velocity of 8' and 3' per second respectively The direction and fall of the drain proposed, follow the natural slope of the ground

CONSTRUCTION OF DRAINS 4 Sill pattern drains are of U shaped at the bottom

bottom, laid in surki concrete, plastered with 1/2" cement side slabs are imbeded in surki ~~xxxxxx~~ concrete, and pointed the joints with cement

5 For crossing of lanes and roads 6" thick burnt stone slabs are provided with joints dressed vertically and pointing the joints with cement - including cushion earth of 9" in depth over the covering slabs On both ends of the road crossings burnt stone parapets are proposed to be fixed in vertical to the width of drain and close to the covering slabs to prevent the covering slabs from being displaced and also to keep the flow of storm water within the limits of main or collecting drains at meeting places

Road Crossing and Parapet

6 The town is surrounded on all three sides by the river Vedavathi very close to the town towards North, East and West and so all the outfalls do not permit to be linked up into one common outfall at a selected place; consequently it is left to flow into the adjacent river in their natural course If desired the above sewage can be made use of for a small vegetable garden along the right bank of the river by allotting small plots of 10 Yds x 10 yds in ~~terraces~~ terraces and leased out for cultivation This way of the municipality can expect some income out of it

Outfalls

7 The cost of drainage scheme for the construction of main drains and street drains are as follows -

Cost of Scheme

	Main	Street drains
No I drainage area	2,520/-	12,000/-
II " "	3,110/-	~~11,190~~/- 11370
Total is	5,630/-	~~23,190~~/- 23370

Grand total is ~~25,820~~/- 29000

The rates provided in the estimate are as per local rates

local rates of the place and calls for no special remarks The municipality need not be afraid of the total cost of the scheme The whole scheme is to be distributed for a period of 8 to 10 years according to the financial circumstances of the municipal - Council and a programme chalked out accordingly, in the following order, firstly main drains, secondly drains in the conjested localities and lastly the remaining drains The whole scheme is a comprehensive one and there will be no difficulty to execute the scheme in piece meal This department will always be ready to give professional advise and help in executing the above scheme
